SLRL LAB TEST DIRECTORY

The SLHS Marketing Web team is working hard to roll out improve security on the saintlukeskc.org website. The SLRL Lab Test Directory (LTD) resides within that website, so we are gaining additional security for our directory at the same time.

Tonight 11/2/2021 at 19:00 the new saintlukeskc.org website will launch. No visual format changes are expected, yet there is a functional change that I want to make you aware of.

You can still type in search criteria - like a partial test name, EPIC Procedure Test code or CPT in the **search box** and rather than having the list of optional tests meeting your search criteria automatically yield, you will now need to **click** on **TEST SEARCH** button to yield results after you enter your search criteria.

The screenshot shows the Saint Luke's website interface. At the top, there is a blue banner with a COVID-19 update. Below that is a navigation menu with links like 'Find a Doctor', 'Locations', 'Conditions & Treatments', etc. The main content area is titled 'Lab Test Directory—Saint Luke's Regional Laboratorie'. A search box contains the text 'CBC' and a blue 'TEST SEARCH' button is to its right. A dropdown menu is open below the search box, listing several test results:

- Complete Blood Count (CBC) with Differential, Blood (CBC DIFF)
- Complete Blood Count (CBC), Blood (CBC ONLY)
- Prenatal Panel 1 (PRENATAL 1)
- Prenatal Panel 2 (PRENATAL 2)
- Prenatal Panel 3 (PRENATAL 3)
- Prenatal Panel 4 (PRENATAL 4)

Below the dropdown, there is a list of test codes and names:

- 17OHPG 17-Hydroxyprogesterone
- 21 HYDROXYLASE 21-Hydroxylase Antibody
- VIT D25 25-OH Vitamin D, Serum or Plasma
- REF MISC 3-Hydroxy-3-Methylglutaryl Coenzyme-A (HMG-CoA) Reductase
- 5HIAA 5 Hydroxyindoleacetic Acid (HIAA) Quantitative, 24 Hour Urine
- 5 NIUCLEO 5' Nucleotidase

This is expected to be a temporary situation and I will let you know when Marketing has this corrected in a few weeks.

Contact me directly should you have questions.

Thank you,

Kim
